

# Probis Club of Breakfast Point

## Care and Support Policy

The Breakfast Point Probis Club recognises the need to ensure that members are able to access a small subcommittee of members who are able to provide practical support in times of need, for example, transport for medical, dental and hospital day surgery where the member is unable to drive themselves.

While supporting our membership the Club and Members need to be acutely aware of observing peoples' privacy.

Individual members are fully responsible for the state of their health and medical information is not collected and held by the Club.

“If medical condition details are known by a member of the committee these details will not be made available to any person or body without prior approval of the member concerned, unless they are disclosed for the purpose of providing medical assistance.
